v2.0

CuraPro Quick Start Guide

CONTENTS

1. System Requirements
2. Installation
3. License Activation
4. First Launch
5. Daily Operations
6. Reports & Exports
7. Backup & Recovery
8. Troubleshooting

1 System Requirements

Component	Minimum	Recommended
Operating System	Windows 10 (64-bit)	Windows 11 (64-bit)
Processor	1.5 GHz dual-core	2.5 GHz quad-core
RAM	4 GB	8 GB
Disk Space	500 MB free	2 GB free
Display	1280 × 720	1920 × 1080
Internet	Required for initial activation only	

⚠ Note

Administrator rights are required during installation.

2 Installation

1. Run `CuraPro_Setup_2.0.exe` as Administrator (right-click → *Run as administrator*).
2. Accept the License Agreement and click **Next**.
3. On the **Store Registration** page:
   - Type your **Store Name** exactly as you want it to appear on invoices.
   - Your unique **Install ID** is displayed below — *write it down or take a photo*.
4. Click **Next**, choose the install folder, then click **Install**.
5. Click **Finish**. CuraPro launches automatically.

> **ℹ Your Install ID**
>
> The Install ID is generated uniquely for this installation. It looks like:
>
> `A3F2-B7D1-C9E4-1A5F-82D0-F6C3`
>
> Share your **Store Name** and **Install ID** with Omnietec to receive your license key.

3 License Activation

CuraPro uses a **two-factor license system**. Your license key is bound to *both* your Store Name and your unique Install ID, making it non-transferable and secure.

Step A — Note your Install ID

During installation the setup wizard displays your Install ID. You can also find it at any time inside the activation dialog when you launch the app.

Step B — Contact Omnietec

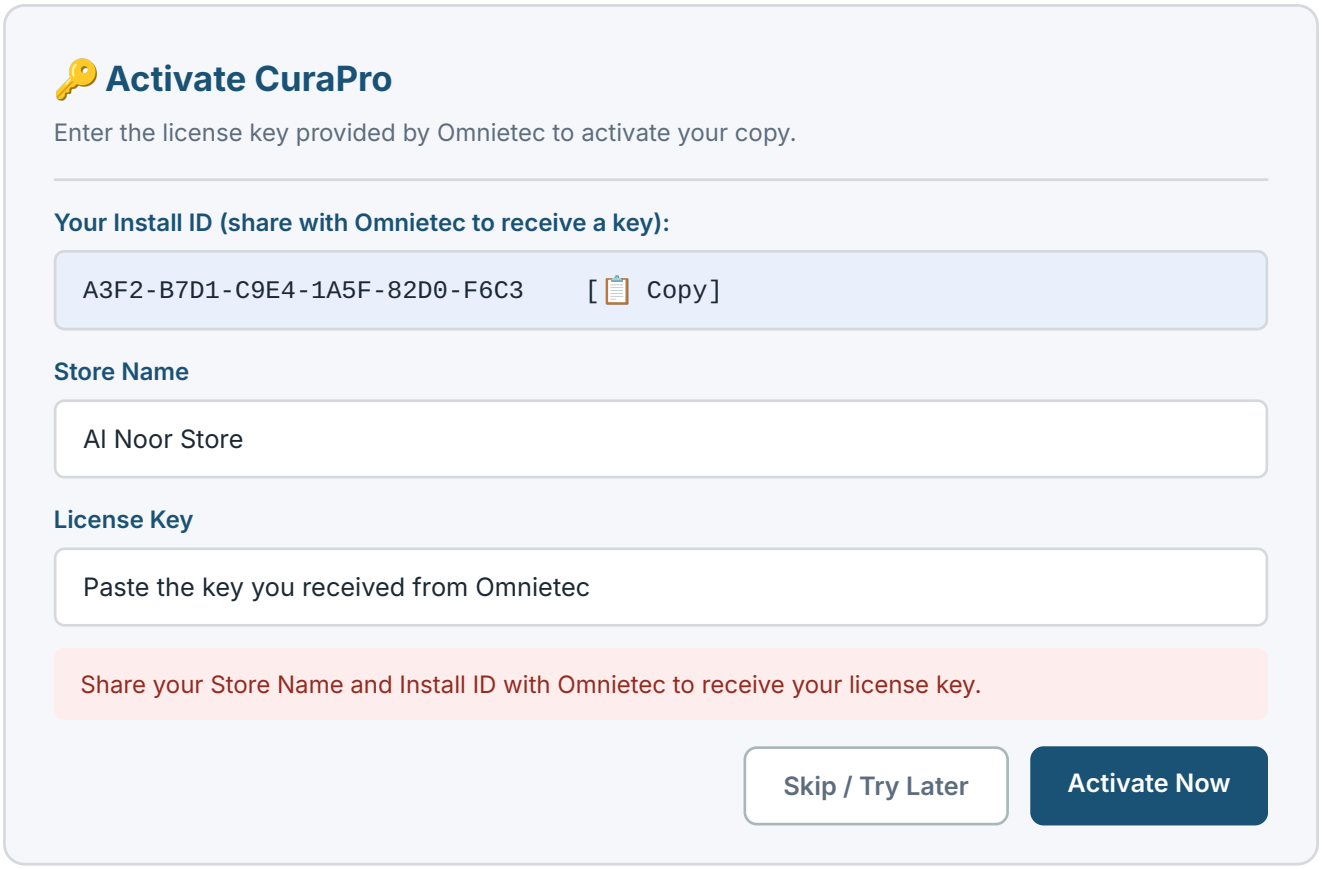

Email or WhatsApp Omnietec support with:

- Your **Store Name** (exactly as entered during setup)
- Your **Install ID** (24-character code, e.g. `A3F2-B7D1-C9E4-1A5F-82D0-F6C3`)

After confirming your purchase, Omnietec will send you a **License Key** — a short base64 string.

Step C — Activate in the app

The Activation dialog appears automatically on first launch. It looks like this:

1. Verify that the **Install ID** field matches the code you gave Omnietec. Use the 📋 **Copy** button to copy it if needed.
2. Confirm the **Store Name** matches exactly (case-insensitive; leading/trailing spaces are ignored).
3. Paste the License Key you received from Omnietec into the **License Key** field.
4. Click **Activate Now**.
5. A green confirmation message appears and the app opens automatically.

> **✔ Activated**
> Once activated, the license is stored locally. You do not need to activate again after a normal update or system restart.

> **⚠ Re-installation**
> A fresh install on a new machine or after a full Windows reinstall will generate a *new* Install ID. Contact Omnietec to receive a new key for the new ID.

> **ℹ Skip / Try Later**
>
> You can click
> **Skip / Try Later**
> to use CuraPro without activating. All features remain available. The dialog will appear again on next launch.

4 First Launch

1. Log in with the default credentials: username `admin`, password `admin123`.
2. Go to **Settings → Store Information** and fill in your store details (name, address, phone, CR number).
3. Set your **language preference** (English / Arabic) in **Settings → Language**.
4. Change the administrator password immediately under **Settings → Change Password**.
5. Add your inventory via **Inventory → Add Medicine** or import from a CSV file.

5 Daily Operations

Point of Sale

Open the **POS** module. Search for items by name or scan the barcode. Add to the cart, select the customer, and press **Checkout** to generate an invoice.

Inventory Management

Use **Inventory** to add stock, update prices, set low-stock alert thresholds, and track expiry dates. Items expiring within 30 days are highlighted automatically.

Customer & Supplier Management

Manage customer records and credit balances under **Customers**. Track suppliers and purchase orders under **Suppliers**.

Returns

To process a return, open the item in **Inventory**, click **Return / Adjust Stock**, and select the reason. Stock is updated automatically.

6 Reports & Exports

The **Reports** module provides:

- **Sales Report** — daily, weekly, or custom date range
- **Expiry Report** — items expiring within a chosen number of days
- **Top-Selling Items** — ranked by quantity or revenue

All reports can be exported to **PDF** using the *Export PDF* button in the top-right corner of each report.

7 Backup & Recovery

The CuraPro database is stored at: `%APPDATA%\CuraPro\curapro.db`

Your license file is stored at: `%USERPROFILE%\.curapro\license.lic`

> **⚠ Back up regularly**
> Copy both files to an external drive or cloud storage weekly. If you move to a new PC, copy the database file; the license will need to be re-issued for the new Install ID.

8 Troubleshooting

Problem	Solution
Activation dialog keeps appearing	Make sure the Store Name matches exactly what you gave Omnietec. Paste (don't type) the License Key.
"Invalid license key" error	Check for extra spaces in the Store Name. Copy the Install ID with 📋 and share it again with Omnietec.
App won't start after reinstall	A new Install ID was generated. Contact Omnietec with the new ID for a replacement key.
Database error on launch	Restore the latest `curapro.db` backup to `%APPDATA%\CuraPro\`.
Barcode scanner not working	Ensure the scanner is in HID/keyboard mode. Test by scanning into Notepad first.
